

**IN THE SPECIFICATION:**

Please amend the paragraph, starting at page 6, line 6, as follows:

The present invention will now be described by way of example with reference to the accompanying drawings in which:

Figure 1 shows a prior art model for a conferencing system;

Figure 2 shows a prior art dial-in conferencing system;

Figure 3 shows a conferencing system according to the invention;

Figure 4 illustrates a flow chart presenting steps for administering conferencing resources in a communications system;

Figure 5 shows the elements of the conference server, according to one embodiment of the invention.

Please add the following paragraph, starting at page 6, line 6, as follows:

As illustrated in Figure 4, the process of administering conferencing resources in a communications is provided, for at least one embodiment of the present invention. As described above, first message is transmitted to a server, requesting a resource capable of sustaining a conference call, in step 401. Thereafter, the server allocates a network address identifying a resource capable of sustaining a conference call, in step 402. The server transmits a second message to the first terminal having the network address, in step 403. The component units that provide the above discussed functionality are illustrated in Fig. 5, namely the Receiver Unit 501, the Allocation unit 502 and the Transmission Unit 503.
